Sterylicator UV kosmetyczny

Sterylicator kosmetyczny lampowy owalny typu UV to urządzenie które niszczy bakterie. Sterylicator lampowy Germix jest niezbędny w każdym salonie fryzjerskim i kosmetycznym, ponieważ sterylizacja jest wymagana przez sanepid. Niezastąpiony w przypadku, gdy narzędzia nie mogą lub nie powinny być sterylizowane płynami. Dzięki sterylizatorowi Germix oszczędzasz czas

60 / 100 Speed

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 8 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

- <http://sterylizator.info.pl/wp-includes/js/jquery/jquery.js?ver=1.11.3>
- <http://sterylizator.info.pl/wp-includes/js/jquery/jquery-migrate.min.js?ver=1.2.1>
- <http://sterylizator.info.pl/wp-includes/js/underscore.min.js?ver=1.6.0>
- <http://sterylizator.info.pl/wp-content/themes/sequential/js/navigation.js?ver=20141022>

Mobile

- <http://sterylizator.info.pl/wp-content/themes/sequential/js/thumbnail.js?ver=20141022>
- <http://sterylizator.info.pl/wp-content/themes/sequential/js/skip-link-focus-fix.js?ver=20130115>
- <http://sterylizator.info.pl/wp-content/themes/sequential/js/sequential.js?ver=20141022>
- <http://sterylizator.info.pl/wp-includes/js/wp-embed.min.js?ver=4.4>

[Optimize CSS Delivery](#) of the following:

- <https://fonts.googleapis.com/css?family=Montserrat%3A400%2C700>
- <https://fonts.googleapis.com/css?family=Open+Sans%3A300italic%2C400italic%2C600italic%2C700italic%2C300%2C400%2C600%2C700&subset=latin%2Clatin-ext>
- <https://fonts.googleapis.com/css?family=Source+Code+Pro%3A400%2C700>
- <http://sterylizator.info.pl/wp-content/themes/sequential/genericons/genericons.css?ver=3.4.1>
- <http://sterylizator.info.pl/wp-content/themes/sequential/style.css?ver=4.4>

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- http://sterylizator.info.pl/wp-content/uploads/2016/01/cropped-clin_2.jpg (expiration not specified)
- https://static.doubleclick.net/instream/ad_status.js (15 minutes)

Minify CSS

Mobile

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 2.5KiB (21% reduction).

- Minifying <http://sterylizator.info.pl/wp-content/themes/sequential/style.css?ver=4.4> could save 2.5KiB (21% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 16.2KiB (13% reduction).

- Losslessly compressing http://sterylizator.info.pl/wp-content/uploads/2016/01/cropped-clin_2.jpg could save 16.2KiB (13% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 49% of the final above-the-fold content could be rendered with the full HTML response snapshot:13.

4 Passed Rules

Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Enable compression

You have compression enabled. Learn more about [enabling compression](#).

Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

99 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `WordPress.com` is close to 1 other tap targets.
